

Welcome to the Medical student / Junior Resident Emergency Abdominal Surgery Course (EASC). This course is based on the award winning EASC for registrars/junior consultants. The first EASC course was held in Letterkenny, Donegal Ireland in May 2012.

The course is tailored to the curriculum of medical students and the needs of doctor and residents in related specialities. It is an ideal preparation for those who wish to excel at their exams, and face acute abdomen with confidence. Since the first course in 2015, EASC is rated by final meds as one of the best educational events in their student's curriculum.

Courses in Emergency Surgery are developing with WSES, ESTES in Europe and MOSES in Australia and New Zealand. None have been pitched for the specific need of medical students and young doctors. Focuses on the acute abdomen, in a multidisciplinary shared learning approach. It deals with real patients.

It will bring you a level of discussion you have not heard before and enhance your knowledge of presentations, symptoms, signs and management. This course is about the patient and common emergencies. It combines theory with practical cases. Over half of the course will involve discussion between consultants. You will not be put on the spot – to promote a relaxing learning environment.

Course Goals

Understand key emergency abdominal cases
Make you a better-confident intern
Expose you to real scenarios
Great prep for your exams

Who should attend?

Final Meds, young doctors, those in early years of related specialities (surgery, gastro, emergency, radiology)

Donegal Clinical Research Academy would like to thank Trinity College and other Universities for their support.
